

# **Surface Flux Estimations over Tropical Oceans Using TRMM Data**

**Bing Lin<sup>1</sup>, Alice Fan<sup>2</sup>, Paul Stackhouse<sup>1</sup>,  
and Lou Smith<sup>3</sup>**

**<sup>1</sup>NASA Langley Research Center**

**<sup>2</sup>SAIC**

**<sup>3</sup>National Institute for Aeronautics**

**CERES Science Team Meeting  
Hampton, VA, Nov. 18, 2003**

# Outline

## Background

**4DDA model results:**

$\sim 40 \text{W/m}^2$  heat transport over land

**Method:** TRMM satellite

**SW & LW :** Model B of CERES SSF

Gupta et al. (2001); Gupta et al. (1992)

**bulk formula:** SST, Qa, WS,

$T_s - T_a, Q_s - Q_a, WS_{AIR} - WS_{OCEAN}$

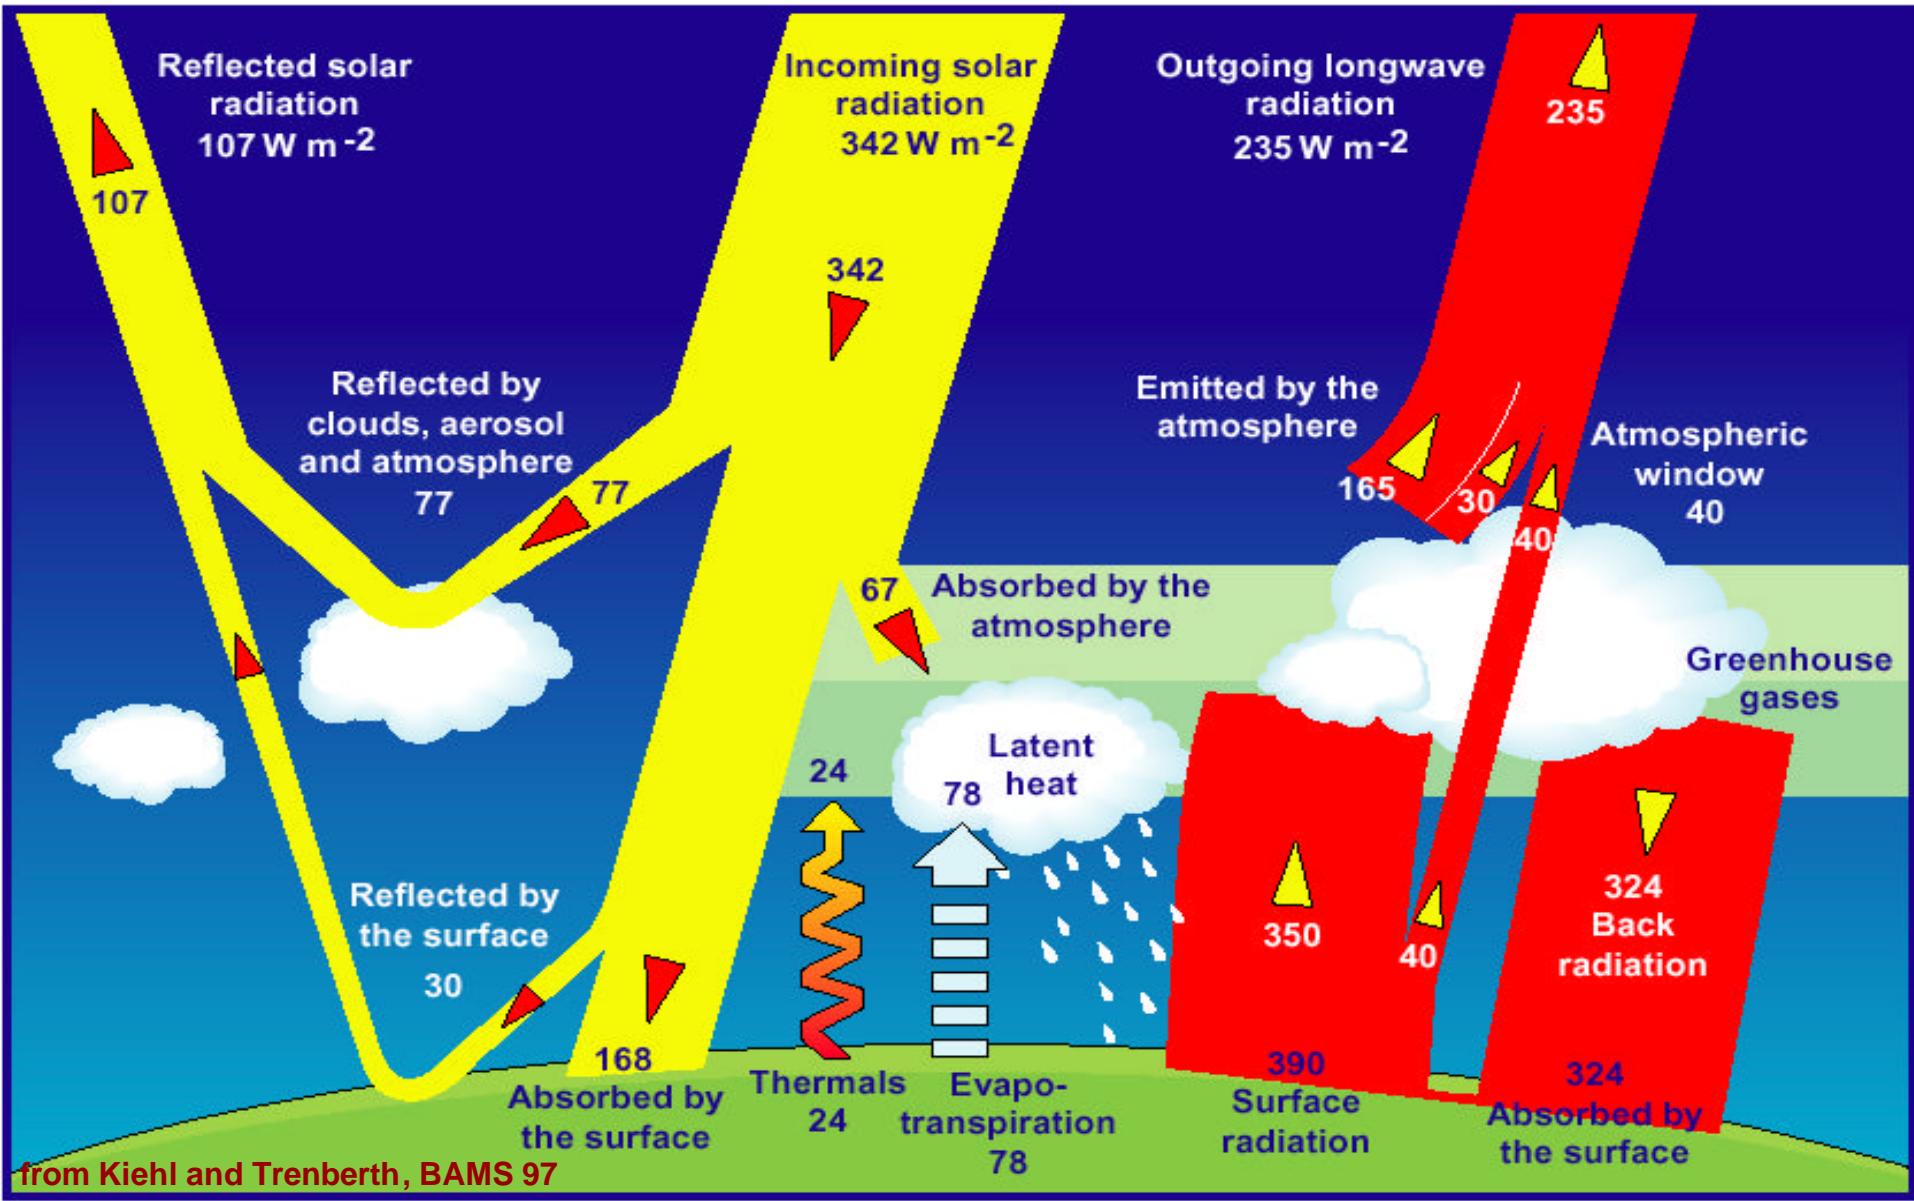

**TOGA COARE algorithm**

## 3. Results

## 4. Summary

# The Energy Cycle:

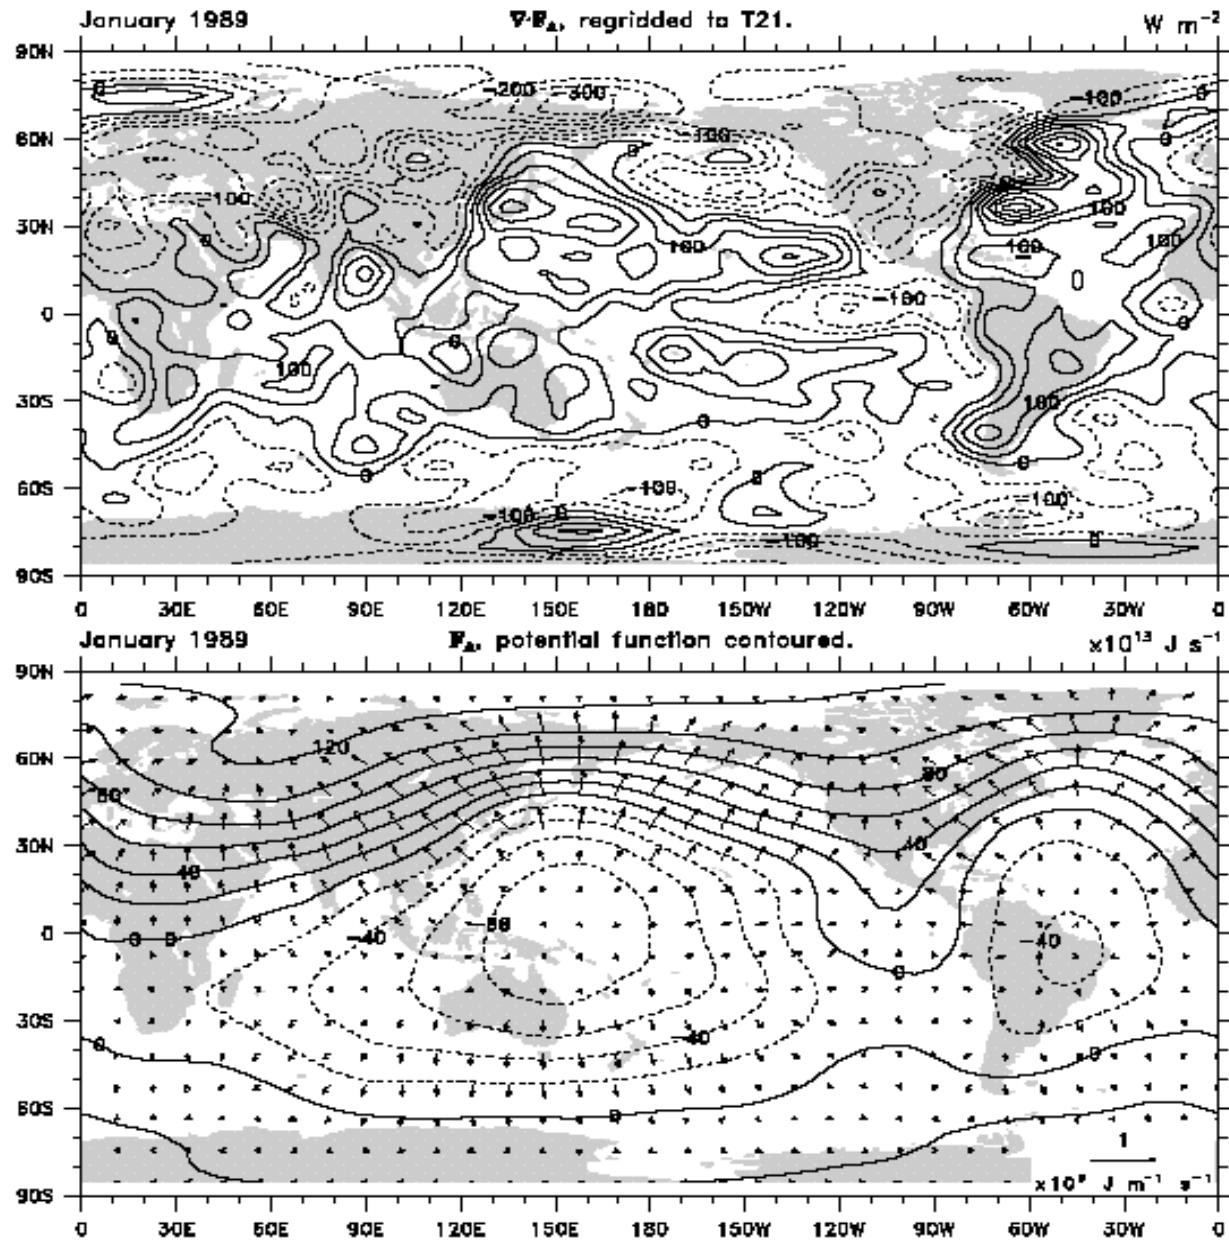

# Atmospheric Energy Transport

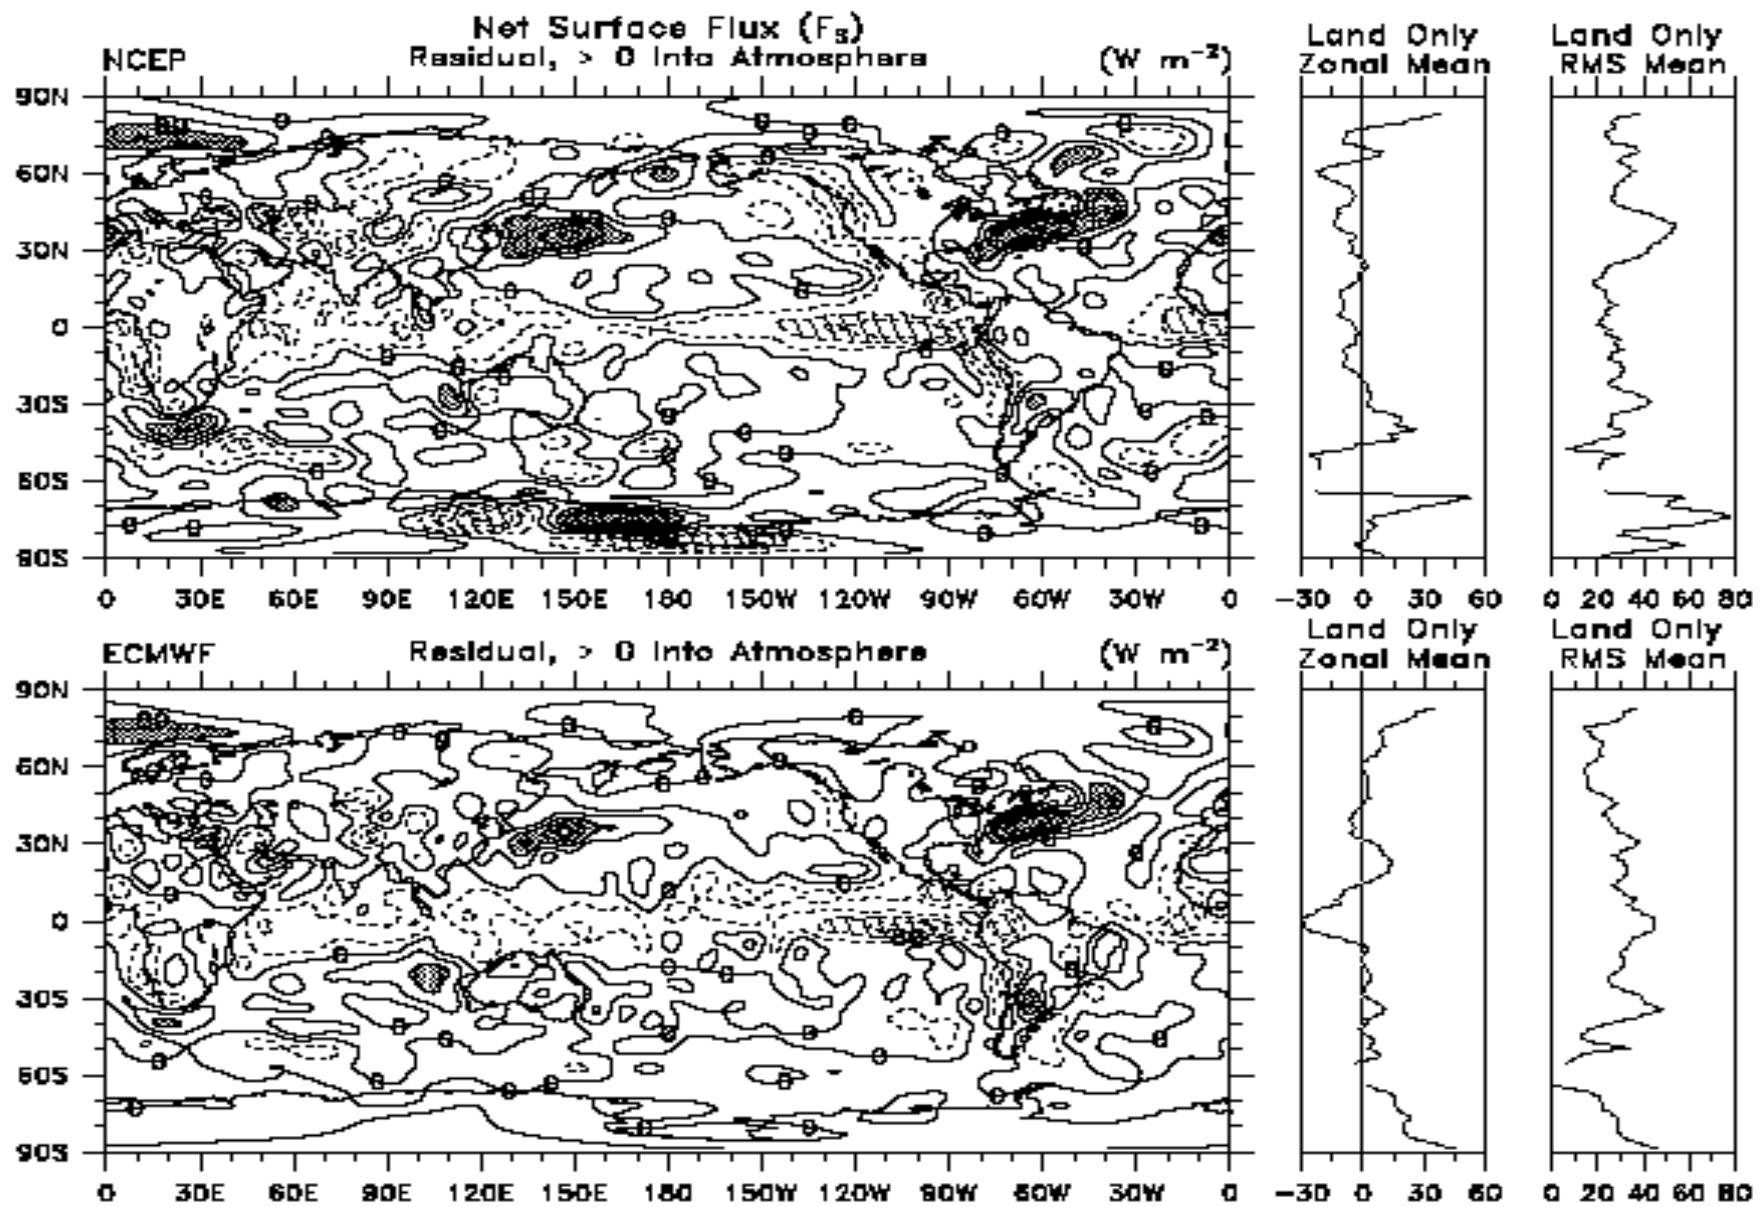

$$\nabla \cdot \mathbf{F}_A = R_T + F_S$$

$$F_A = g^{-1} \dot{a}(h+k) vdp$$

# Energy Balance over Land

# retrieval method

**surface radiation: model B of CERES SSF**

**SW : Gupta et al. (2001); LW : Gupta et al. (1992)**

**surface turbulence: bulk formula: SST, Qa, WS**

**T<sub>s</sub> - T<sub>a</sub>, Q<sub>s</sub> - Q<sub>a</sub>, W<sub>S<sub>AIR</sub></sub> - W<sub>S<sub>OCEAN</sub></sub>**

**TOGA COARE algorithm (Fairall et al. 1996)**

$$H_{LAT} = rL C_L(U_a - U_s)(Q_s - Q_a) \quad (1a)$$

$$H_{SEN} = rC_P C_S(U_a - U_s)(T_s - T_a) \quad (1b)$$

$$NSF = H_{SW} + H_{LW} - H_{LAT} - H_{SEN} \quad (2)$$

**data analysis:**

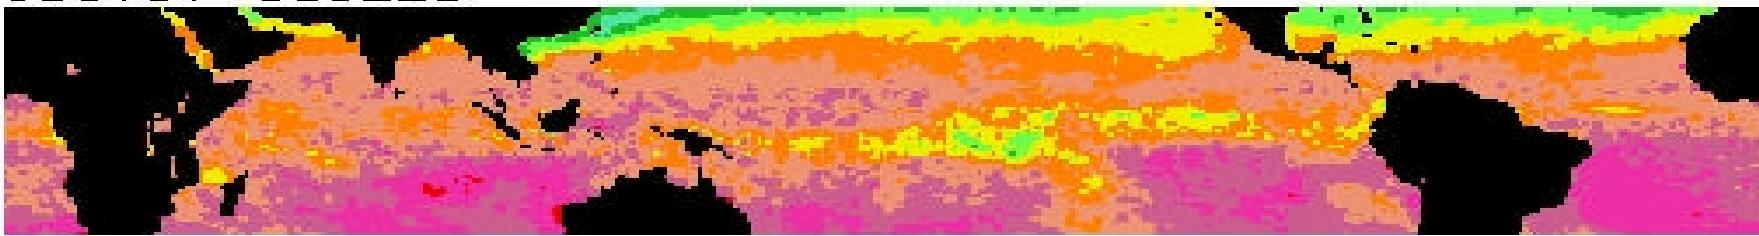

**CERES – surface radiation; TMI – bulk parameters**

# net zonal mean

# summary

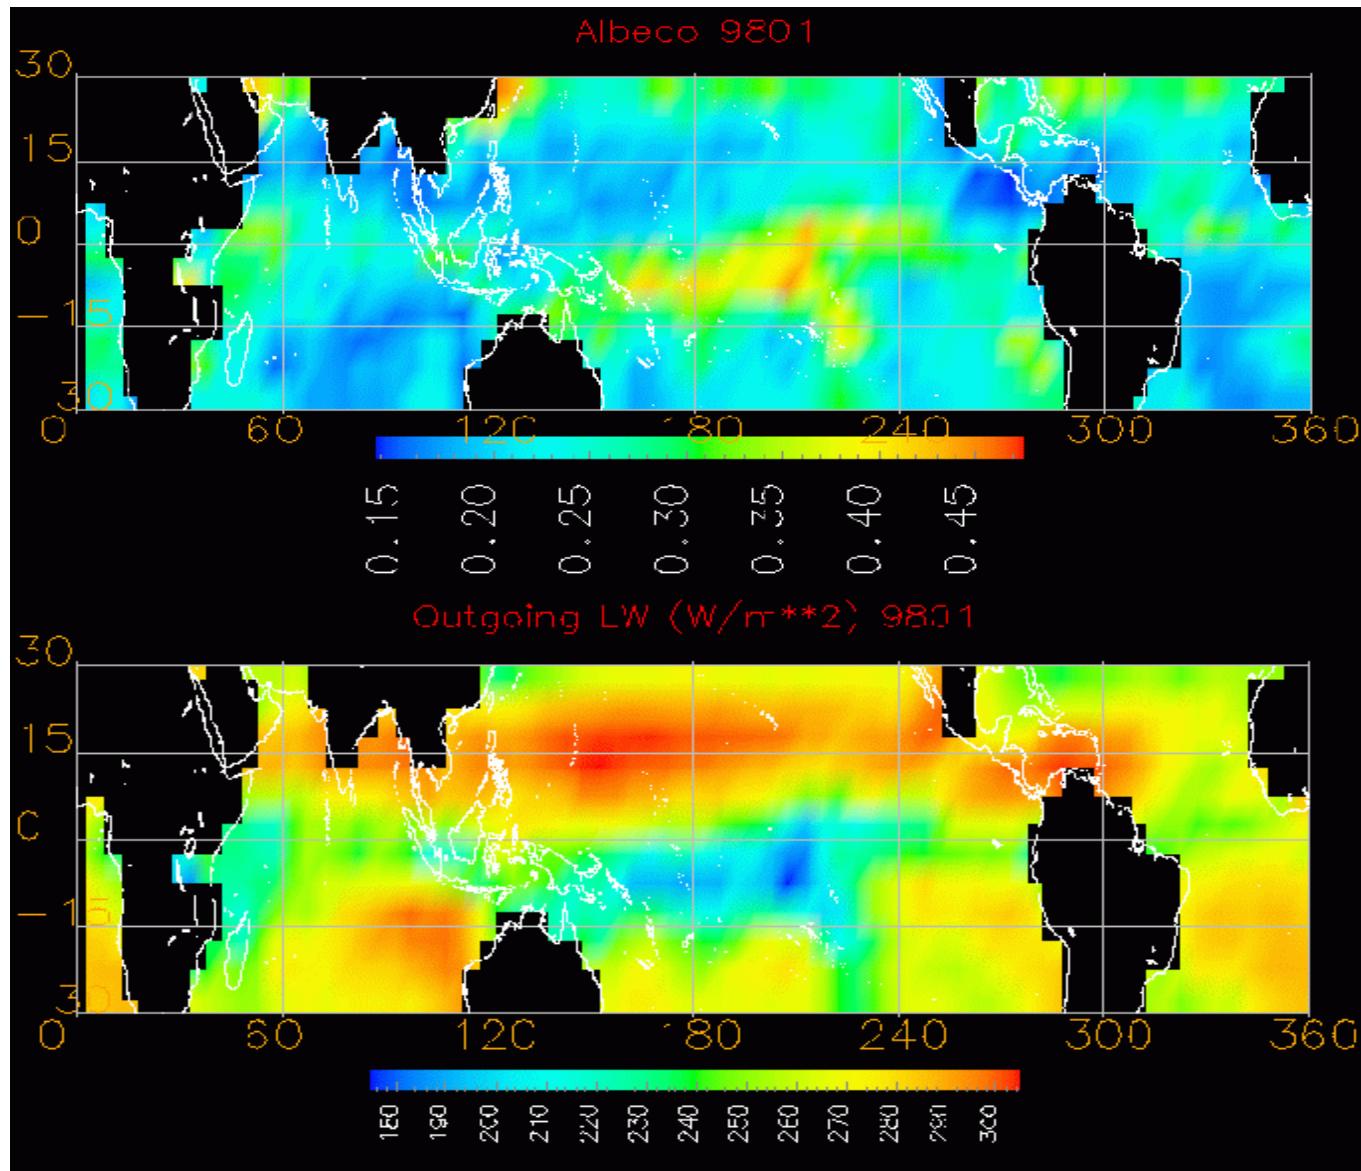

- TRMM: CERES, VIRS and TMI – heat balance over ocean surfaces. The data could be used for model validations.
- Instantaneous bias (rms) errors are approximately -1.9 (40.88) W/m<sup>2</sup>, and -1.64 (6.30) W/m<sup>2</sup> for surface LH and SH fluxes, respectively, when directly compared to in-situ ship measurements.
- Compared to Goddard SSM/I product: LH and SH biases are 10 to 30 W/m<sup>2</sup> and 6 to 8 W/m<sup>2</sup>, respectively.
- Tropical oceans generally gain 46, 52, and 26 W/m<sup>2</sup> heat from the atmosphere for northern hemispheric winter, spring, and summer seasons, respectively.
